Have your Plants sent by Express.

They will reach you quicker and in better condition than by any other way.

We have secured for our customers from Express Companies
20% Reduction
in Express Rates on Plants.

Under the new ruling of the leading Express Companies advocated and secured by us, plants packed in closed or crated boxes will now be carried at the "General Specials" rate. This rate means a reduction of 20 per cent. from the regular merchandise rates to all points where no "General Specials" exists. To points where a "General Specials" rate is in force the companies make a special reduction. Shipments weighing less than 100 lbs. receive the benefit of the rate per 100 lbs., but the minimum charge is 35c. For instance, where the regular merchandise rate is \$4.00 per 100 lbs., a box of plants packed closed, weighing 100 lbs. will be carried for \$3.20, a saving of 80c. on one shipment.

HENDERSON'S INVINCIBLE ASTERS.

HENDERSON'S
INVINCIBLE ASTER.

A superior type, of healthy, robust growth, producing long-stemmed flowers of immense size and perfect form. They are of surpassing beauty when cut for vases, and of incomparable effect for garden beds.

The highest achievement in China Asters, a superior race in every way. The plants are of very healthy, robust, branching growth, about two feet high, producing, on long stems, massive, peony-formed flowers of perfect form and faultless outline, and exceedingly double to the very centre. The flowers are the most beautifully formed of all large Asters. The petals are of thick durable substance, and, in consequence, the flowers last long in perfection. When well grown the flowers of Henderson's Invincible Asters average 3½ inches across; 4-inch flowers are quite common, and if grown especially for cut flowers, the side branches pruned, allowing a plant to carry not over 8 or 10 flowers, one flower to a stem, their size will then be enormous, measuring 4½ and 5 inches across. These magnificent blossoms being gracefully poised on strong, well-leaved stems, 15 to 18 inches long, resemble good-sized Chrysanthemums, and are unsurpassed as cut flowers.

- Invincible, rose pink, pkt. 15c.; 1000 seeds 50c.; \$3.00 per oz.
- " white pkt. 15c.; 1000 seeds 50c.; \$3.00 per oz.

Asters ^{Extra} Early Express Comet.

A new early-flowering section of great merit, not only for garden purposes, but of even more value for early cut flowers. Extra early flowering Asters have heretofore been produced at the expense of either size, doubleness, substance or length of stem, but the Express Comets are equally as good as later-flowering sorts and come into bloom in the open ground with us by the middle of July. The biggest early Asters we know of; really large, fine flowers, 3½ to 4 inches across, of very double graceful comet type; splendid substance and long stems; plants healthy and sturdy, of branching habit, 18 inches high; free bloomers.

In Praise of Henderson's Invincible Asters

" My 'Henderson's Invincible Asters' were awarded first prize at the Port Huron Flower show—three flowers each of three varieties. There were thirty entries, so you may imagine how pleased I am with my first year's experience in growing prize Asters."

M. H. WESTBROOK, Port Huron, Mich.

" I must say one word about your Invincible Asters, they are the finest in the land, so all the people that see them say, and that has been no small number."

C. A. BRIGGS, Taunton, Mass.

" I grew your white Invincible Asters with stems 28 inches long, flowers 4½ inches across—all double and perfect flowers."

J. A. BALLON, Springville, N. Y.

The flowers of this wonderful strain often measure 3 inches across, and are usually as double as double can be. The variety of color includes white, blush, deep pink, salmon, carmine, scarlet, dark crimson, maroon, and many beautifully variegated flowers. Most of them have beautifully fringed petals, and are delightfully fragrant. One great merit of these Carnations is that they commence to flower in about twelve weeks' time from seed. Seeds sown in the spring will produce luxuriant plants that will be continually full of bloom from August until killed by severe frosts, or seeds may be sown during the summer for the winter-flowering plants.

HENDERSON'S SUPERIOR

GIANT PANSIES.

Years of scientific culture, hybridization and selection in raising pansies have gradually evolved a superior race of luxuriant, robust growth and deep rooting, drought-withstanding qualities; the flowers have also correspondingly improved in size, substance, form and color. At first there were only one or two varieties in this class of pansies, but annually one or more varieties would reach the goal of the Giants, until now we have such a complete variety of colors, that we, this season, discard all ordinary sized pansies, excepting those used in our cheapest mixture.

"I think I have tried everybody's best pansies and none of them can hold a candle to Henderson's big ones."

HENDERSON'S
MAMMOTH
BUTTERFLY PANSY

Henderson's MAMMOTH BUTTERFLY Pansies.

These Pansies we are very proud of. We have sold them for a number of years and receive hundreds of letters praising their superior beauty, size and other merits; they were awarded a medal at the Columbian Exposition, Chicago, where they competed with the best from all over the world. When our unequalled collections of all types of pansies are in bloom we go over them daily and any plant producing flowers of superlative merit is removed to our "Mammoth Butterfly" plot of pansies, where nothing but the largest, handsomest and most perfect are allowed to remain. Consequently the seed is saved from the greatest variety of types, including only the best of Giant Cassiers, Bugnots, Trimardeau, 5-blotched Odier, Giant English, French and German hybrids, etc., resulting in the greatest variety of coloring, marking, blotching, veining, etc., for brilliant and attractive beds. (See cut.) Mixed Colors, pkt. 25c.; per 1000 seeds 50c.; oz. \$5.00.

"I have grown large pansies before, but never saw the equal of the Giant Butterfly, the seed of which I got from you last fall. I have a large bed of them; the plants are 20 inches high, and the stems of the blossoms 9 inches long, while the blossoms themselves are simply monstrous, each one a broad expanse of beauty."
THOMAS C. STARR, Newton, Mass.

Henderson's GIANT RUFFLED Pansies.

A remarkable strain of Giant Pansies, the flowers of which are so large and full that the broad petals seem to be "gathered" to the stem, causing them to be undulated and fluted from centre to circumference, not unlike "frilled" velvet. The unusual substance of the flowers, aided by these corrugations, thus enables them to present bold, open and handsome faces, even during windy or dry summer weather, when other pansy flowers flop or wilt. The flowers are extraordinarily large and are borne on strong stems well above the foliage; they are nearly all five-blotched on the "odier" pattern, and contain rich combinations of coloring, including some new tints and blendings not met with in other pansies. The plants are vigorous and large, and flower abundantly. (See cut.) Mixed Colors, pkt. 25c.; per 1000 seeds 30c.; oz. \$3.00.

Henderson's GIANT MOTTLED Pansies.

A distinct new type of Pansies of greatest merit. The plants are of compact, bushy form with luxuriant foliage. They root unusually deep, and are not susceptible to drought and heat; the flower stems are particularly strong, holding the flowers upright. The great merits of these pansies, however, lie in the giant size and profusion of flowers—well grown they measure 3 to 3½ inches across—and of most gorgeous effects, blotched, spotted, marbled, veined, striped and blended, colors passing through reds, rose, pink, white, purple, in beautiful and indescribable variegation. These pansies were awarded a prize at the Paris Exposition, 1900. Mixed Colors, pkt. 25c.; per 1000 seeds 35c.; oz. \$3.50.

Henderson's MAMMOTH PARISIAN Pansies.

The Parisian Pansies are distinguished by their magnificent and varied colors and strong markings. There is usually a large "blotch" on each of the five petals, with a surrounding band of some strikingly contrasting color, over all of which is thrown a cobweb-like netting of yet another hue. The combinations prevailing are composed of shades of cinnamon, violet, canary and orange-yellow, black, garnet, light blue, indigo, cream, etc. These pansies have been brought up to a high standard of excellence, the flowers being of fine substance, perfect shape and of mammoth size, measuring, when properly cultivated, four inches across. A large number of these pansies are also very fragrant. Mixed Colors, pkt. 25c.; per 1000 seeds 35c.; oz. \$3.50.

HENDERSON'S

GIANT SINGLE PETUNIAS.

A strain of incomparable beauty, size and luxuriance. Most of the flowers are exquisitely ruffled or fringed on the edges, and are of enormous dimensions (4 to 5 inches across), but their great merits lie in the tremendous variety of colors, markings, veinings, blotches and stripings; in the most grotesque and beautiful combinations; some with charming deep throat of yellow, white, black, green or maroon, running off into intricate veins. Some of the colors are rich and gorgeous and others of lovely delicate shades.

"Last year I got seeds of your Giant Single Petunias. Some of the flowers measured 6 inches across, and were the admiration and wonder of our little city."
D. FILSON Steubenville, Ohio.

Henderson's Giant Double Petunias.

are as large as Hollyhocks; as double as double can be, with edges finely fringed, petals fluted and crinkled, intensifying and varying the colors with high lights and dark shadows, bringing out a richness and effect unmatched by crumpled velvet, which the flowers resemble. There is a variety of colors—selfs, blotched, veined, margined, etc.; in short, these double Petunias are unsurpassed by any other strain in the world.

"I bought seed of your Giant Double Petunias last winter, and raised some beautiful single-flowering sorts and 60 fine double ones. I have never seen anything so fine in my experience of twenty years. I would not take \$60.00 for the 60 double plants."
H. H. HUNTRESS, Manchester, N. H.

New Giant Star Primroses.

(PRIMULA STELLATA HYBRIDA GIGANTEA.)

This distinct and beautiful type should be better known, for they are unrivaled winter and spring flowering pot plants and for table decoration unique and effective. The attractive dark foliage on purple stems makes a striking contrast to the innumerable star-shaped flowers borne in graceful pyramidal clusters. The flowers of this new type are much larger than the old type stellatas and of greater substance.

These new, large-flowering hybrid ever-flowering Primroses are great improvements, producing trusses of large fringed-edge flowers nearly double the size of the older type and containing several colors, including lavender, blush-pink, white, rose, etc.; favorite pot plants for house and conservatory culture on account of the wonderful blooming qualities, flowering nearly the year through.

Large-Flowering "Continuity" Stocks.

This comparatively new type produces the largest double flowers of any class in the Stock family. The flowers are borne on long trusses standing 2 to 2½ feet above the ground. The plants are of strong, healthy, robust growth and produce continuously for weeks their fine spikes of splendid flowers which are also delightfully fragrant. Plants from seeds sown in the spring, commence blooming in early summer and continue until cut down by frost. They, however, are equally valuable as winter flowering plants and furnish excellent cutting material. For the latter purposes sow the seeds during the summer. They commence flowering in from 12 to 15 weeks from seed sowing.

HENDERSON'S

Colossal Ten-Week Stocks.

This magnificent strain is without a rival for open-ground planting, attaining a height of 2½ feet. The spikes of bloom are very long, and the individual flowers are enormous in size and very double.

These popular flowers are enormous in size and highly fragrant and of such great beauty, and have so many good qualities, that they deserve a place in every garden. They should be given good rich soil to grow in, and will amply reward good treatment with remarkable large pyramids of bloom; the flowers represent a great diversity of brilliant color. (See cut.)

PARTICULARLY ADAPTED TO FLORIST'S REQUIREMENTS.

This departure in Sweet Pea offering is the result of an expressed want from many customers for Sweet Peas to color, numerous variety names being confusing to them and of secondary importance. Preferred colors and shades, however, must not clash with others less favored. We have made a study of this aesthetic subject and believe we offer the desired in the under-noted.

New Climbing Rose **DR. W. VAN FLEET.**

Disease-Proof, Hardy and Ever Blooming. Awarded the Silver Medal of the Horticultural Society of New York in 1908.

We could dilate on this fine new Rose but prefer to reprint from the "Florists' Exchange" of June 26th, 1909, that portion of an article referring to it.

"I think the greatest sensation in climbing or rambling roses will be Dr. Van Fleet. I have had a trial plant for five or six years, and it excels all other climbing pink roses as much as Killarney excels Hermosa. It is a Wichuraiana-President Carnot cross, with shell pink blooms of perfect finish, borne on long stems, the general appearance suggesting a glass-grown Tea. The flowers last so well after cutting that it is likely to be very useful in the trade. Foliage is handsome, growth strong, and the plant is as hardy as the hardiest."

The parentage is Souvenir du Pres. Carnot x Rosa Wichuraiana, it bears flowers which, when open, run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkably delicate shade of flesh pink on the outer surface, deepening to rosy flesh in the center. The flowers are full and double, of delicate perfume, buds pointed, stems twelve to eighteen inches, and fine for cutting. The foliage is a peculiar shade of bronze green, large and glossy, with spines a bright bronze red. The variety is a vigorous grower, immune from mildew. (See cut.) Price, plants from 3 inch pots, \$2.50 per doz., \$20.00 per 100.

Other Disease-Proof New, Hardy Climbing Roses.

The great drawback to hardy climbing roses has always been their susceptibility to disease, particularly that scourge known as white mildew. That tendency has been eliminated in the sorts raised by crosses on *Rosa Wichuraiana*. This has been known and appreciated by close observers but has not been fully appreciated by the majority of growers, hence our emphasizing it now. We offer below a choice collection. They all make splendid pot plants for Easter blooming

THE "GARNET CLIMBER."

A grand, new hardy climbing Rose, a cross between a dark red variety and *Wichuraiana*. The great fault with *Crimson Rambler*, viz.; its susceptibility to mildew and red spider is entirely absent in this beautiful variety. The flowers are produced in clusters, a rich garnet crimson, delightfully fragrant, a quality said to be the soul of a flower and lacking in the *Crimson Rambler*. The foliage is luxuriant, a deep green with a highly polished surface. Those who have failed with *Crimson Rambler* may plant this with safety, those who have succeeded with it may plant it as it is distinct from it, eventually we believe it will be planted exclusively for red climbing roses. Price, plants from 5-inch pots, \$4.00 per doz., \$30.00 per 100; 3-inch pots, \$1.00 per doz., \$8.00 per 100.

OTHER DISEASE-PROOF NEW VARIETIES.

LA FIAMMA. Intense flaming scarlet with a silvery white "aureole" in the center. The flowers are single, about two and one half inches across, borne in clusters on long stems and fairly cover the plant.

PARADISE. A combination of pink and white. The edges of the petals are imbricated giving a very artistic effect.

DELIGHT. Just what its name suggests. The color is bright carmine, white at the base of the petals, the center of each flower filled with golden yellow anthers.

EVANGELINE. The flowers are single, 2 inches across. The coloring is exquisitely dainty, the center being white half way up the petals, merging into a beautiful, clear, but soft shade of pink.

HIAWATHA. The color is glowing ruby-crimson, the center being clear white and filled with rich golden yellow anthers, a striking and beautiful combination.

WEDDING BELLS. The flowers of this variety are double. The color is white, the upper half of the petals a soft pink so that the general color effect is a dainty china pink. Price for the above, plants from 3-inch pots, \$1.25 per doz., \$10.00 per 100.

DR. W. VAN FLEET: "It excels all other climbing pink roses as much as Killarney excels Hermosa—shell pink blooms of perfect finish, borne on long stems, the general appearance suggesting a glass-grown Tea."

HENDERSON'S Special Grass Mixture for Hay and Permanent Pasture.

Produces Wonderful Hay Crops and Luxuriant Pasture. Lasting for Twenty Years or More.

THIS famous mixture has seeded thousands of acres of meadow and pasture land for progressive farmers and stock raisers in various parts of the United States with most gratifying results. It is a well-balanced combination of a number of native and acclimated foreign grasses and clovers, blended and improved upon during exhaustive trials under widely varied conditions, soils and localities for several years until practically perfect, our aim being to produce under the extremes of the American climate of heat, drought and cold, a PERMANENT, dense and deep-rooting turf that would yield year after year the maximum quantity of hay, and afterwards to afford, if desired, a constant and abundant pasturage. That we have been successful is attested by the numerous letters of praise for this special grass mixture that we have received from the users, and the tributes to its merits published in many of the agricultural journals.

Full description and testimonials from users in our "FARMER'S MANUAL" mailed on application.

The Seed Required.—The poorer the soil the larger the quantity of seed required. Taking one soil with another a fair average would be 3 bushels to the acre. The thicker the seeds are sown the sooner will a fine, close turf be obtained.

The New "Planet Jr." Hill and Drill Seeders.

FOR HAND POWER.

A good Seeder is one of the most important of garden and farm implements; with it the seeding may be done in one-fourth of the time required by hand and be done far better, producing a more even crop and with a great saving of seed; with the "hill droppers" there is also a great additional saving of labor in hoeing and thinning.

The new "Planet Jr." Hill and Drill Seeders are the very best hand-power seed planters in the world. Improvement after improvement

has been adopted as suggested during an experience of 25 years in their manufacture until they are now far in advance of any other Seeders and without a rival. These seeders, at the will of the operator, either sow seeds in a continuous drill, thick or thin, shallow or deep, or they may be

instantly set to plant any desired quantity

of seeds at any of the following regular distances apart: 4, 6, 8, 12 or 24 inches; they open the furrow, drop the seed, cover and roll it and mark the next row at one operation and as fast as a man can walk. The flow of seed may be instantly shut off, thus preventing waste, when turning the end of the row. These Seeders are light in operation, strong, simple and do not get out of order.

To illustrate their usefulness, here is a list of some of the seeds, all of which these seeders will sow in hills or drills:

The New "Planet Jr." Wheel Hoes and Cultivators.

FOR HAND POWER.

Wheel Hoes, with their attachments for cultivating, hilling, furrowing, covering, etc., are among the great labor-savers of the age. They not only make the care of all rowed crops a pleasure, but enable a man to care for five times the area that can be done by "the man with the (other) hoe." They are built substantially for all-day work by an able-bodied man, yet they are adapted to the strength of a boy or woman.

The Double Wheel Hoes, while they work equally well between

two rows of plants, are especially adapted for straddling one row, working close up to both sides of the plants, until they are 20 inches high.

The Single Wheel Hoes are rather lighter than the double, and while the

HENDERSON'S SPECIAL FERTILIZERS.

BETTER THAN ANIMAL MANURES.

We herewith offer thoroughly reliable, and properly balanced chemical fertilizers, compounded for the best growth of various crops. Having made a careful study for many years of plant fertilization we have had exceptional opportunities for determining the proper materials for producing the greatest yield as well as early maturity. Only the choicest, most soluble and easily assimilated ingredients are employed, and while quickly taken up by the plant will not waste in the soil. Our fertilizers contain no weed seeds, have no disagreeable odor, are fine, dry and easily applied.

It is well understood among intelligent farmers, that commercial fertilizers have become a necessity and that it is not possible to produce maximum crops without their assistance even where good animal manures are used.

We are confident that no better commercial manures can be made than Henderson's Special Fertilizers.

No horn, leather, hair, marl or other insoluble materials enter into the composition of our fertilizers.

The Most Beautiful Lawns in America

Are Made in 4 to 6 Weeks' Time With

The "Henderson" Lawn Grass Seed

**It produces a perfect and permanent sward of luxuriant richness.
It is equally valuable for quickly renovating imperfect, old and worn-out lawns.**

Is Used and Praised from Maine to California.

THE "HENDERSON" LAWN GRASS SEED produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm, deep and elastic turf, and it is often ready for cutting in four weeks from time of sowing. This celebrated Lawn Grass is composed of a thoroughly balanced combination of various native and foreign fine-leaved, deep-rooting grasses of interweaving habit, that flourish under our varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth, and velvety sward, free from clumps, is maintained from snow to snow, year after year, and without burning brown in summer, its constant luxuriance rivaling the famous lawns of Old England.

THE BEAUTIFUL LAWNS at the Lewis and Clark Exposition, Portland, Oregon, the Pan-American Exposition, Buffalo, and also at the World's Fair in Chicago, were produced in six weeks' time with "The Henderson" Lawn Grass Seed, which was awarded the highest medal at both Expositions; but what we prize more than gold medals are the hundreds of letters of praise we have on file from the users of The "Henderson" Lawn Grass Seed in almost every State in the Union.

THE "HENDERSON" LAWN GRASS SEED is, relatively speaking, the cheapest seed offered, because, while other lawn grass mixtures on the market will not average over 14 lbs. to the bushel, this weighs 20 lbs. per measured bushel. It is also the Purest, Cleanest and Heaviest lawn grass seed ever offered and it is absolutely free from weed seeds.

We have made the formation of lawns a study for years, and thousands of the finest lawns and grass plots in America were obtained by following our instructions and using The "Henderson" Lawn Grass Seed.

The quantity required for making new lawns is 5 bushels per acre, or for renovating old lawns, 1 to 2 bushels. For a plot 15x20, or 300 square feet, 1 quart is required for new, or 1 pint for renovating old lawns. Full instructions in every package and bag.

Prices, 20c. quart, 75c. for 4 quarts, \$1.25 peck, \$4.50 bushel of 20 lbs. *If by mail, add at the rate of 5c. per quart for postage.*
